Github: <https://github.com/slaterwebdev>

I'm a 25-year-old self-taught dev currently working at Big Marketing as a Frontend Developer. I predominantly develop using **HTML, CSS, JS & BOOTSTRAP** to build sites/event sites for SME's; I occasionally use Wordpress too. Using this technology has helped me to further develop the ability to learn something new whilst working fully remote.

My background is in mechanical engineering, more specifically the nuclear sector, where I worked as a CNC Operator/**Programmer** for **7 years**, solving sensitive problems. I therefore have an efficient and methodical approach to coding. In turn, this has helped to generate my results-based mindset.

Within both my careers I have shown both dedication and motivation, but more importantly passion.

If there is something to be said about me it is that I have a hunger for progression and learning. This is something I would love to demonstrate as a **REACT developer**. I have thoroughly enjoyed teaching myself this technology in my spare time to a proficient level, as my portfolio will demonstrate. I'd now like to take what I've learned and become an asset to your company by using, and continuing to develop my **REACT** skills.

Core Skills

HTML5 – With knowledge of semantic html elements.

CSS3

JAVASCRIPT

BOOTSTRAP5

REACT

SASS

Google Firestore: NoSQL database – Solution until I dive into backend development.

GIT & GITHUB for Version control.

Responsive Design

Work experience

Frontend Developer - Big Marketing (fully remote)

2022 January to Present

- Developed sites using HTML5, CSS3, JS & BOOTSTRAP.
- Developed sites using Wordpress.
- Developed sites solely and as part of a small team.

- Implemented custom code on Wordpress sites.
- Solely leading development meetings with clients.

Self-teaching/Freelancing

2021 October to January 2022

I decided to quit part time learning and fully dedicate my time and energy to becoming a developer, as this is what I truly love doing. In this time, I also acquired **commercial experience**; I was commissioned to create the Frontend for a small E-commerce business as seen in my portfolio.

Player Relations Advisor

Gamesys - Stoke-on-Trent

2021 August to October 2021

Advised players on their online gambling activities and their experience using all the brand websites inclusive of Jackpot Joy and Virgin Games. Key point of contact for website customer feedback for the rest of the team, which in turn would affect the **UI/UX**. Discussing negative feedback with the customer via phone/email and escalating any issues to management.

CNC Turning Machinist

Goodwin International LTD - Stoke-on-Trent

2014 to 2021 July

Working alongside team members and by myself to produce products for the nuclear sector. Directly liaising with clients to ensure that all work meets their requirements. Maintaining the companies high level of quality production and existing programs for engineering components. Writing CNC programs from scratch using the **FANUC & TOSNUC programming languages** directly on the machine. Reading highly detailed engineering drawings and working on very high value components sometimes up to 6 tons in weight.

Manual Gear Cutter

Glebe Engineering - Stoke-on-Trent

2013 to 2014

Education

- 9 GCSE's: All A*-C's, Including Maths (B), English (C) ICT (B)
- Level 3 Diploma in Manufacturing And Engineering (TLR LTD)
- Self-Taught Frontend Development Languages
